

## Nature FIRST: Intro and Demo of Solutions for Biodiversity Monitoring

Join an online session where we will showcase the achievements, solutions, and technologies of Nature FIRST, a project focused on biodiversity preservation. Our goal is to gather feedback from key stakeholders in the ecosystem, as they are the future users of our technology.

The session will begin with an introduction to the project by Jan Kees Schakel from Sensing Clues, followed by a demonstration of our achievements and solutions.

After the demonstrations, we will open the floor to a Q&A session where you can ask any questions and provide us with feedback. We hope to start a discussion about the ongoing challenges in biodiversity preservation and gather insights from key players in the field.

The session will take place on April 26, 14:00 CET. We look forward to your participation and contribution to this important discussion. Please let us know if you can join by filling out the form below. After completing the form, you will receive a link for the session!

**Program (CET):**

14:00 – 14:10 – Introduction of Nature FIRST, Jan Kees Schakel, Sensing Clues

14:10 – 14:45 – Nature FIRST tech & solutions demonstrations

- Taxonomy crossovers: EUNIS, CLC, IUCN Red List, Natura2000 and more
- Ecosystem basemaps (Melanie)
- 3eData Habitat Mapping method
- TrapTagger for Species Recognition
- Towards the Nature FIRST Knowledge Graph

14:45 – 15:00 – Q&A
